

Staff on-site Health Screening

The following staff on-site health screening protocol will be used with all CAC staff.

1. Temperature reading
 - a. We will use infrared thermometers to obtain a temperature reading. Anyone displaying a temperature over 100.0°F will get a secondary reading. Anyone confirmed to have a temperature over 100.0°F will not be allowed entry to the property and will be directed towards appropriate medical care.
2. Observation for overt symptoms and verbal/non-verbal confirmation of daily self-screening
 - a. We will observe them for symptoms and ask if they or anyone in their household has any cold or flu like symptoms; fever, cough, shortness of breath, nausea or sudden loss of taste or smell in last 72 hours?

Your Manager will be responsible for adherence to this protocol throughout the day.
